

Features

Real-time Views

Easy to use, drag-n-drop dashboard views with live data

Cloud-Based

Monitor all of your equipment in one centralized place

Broad Connectivity

Connect any equipment that speaks Modbus or SNMP

Alerts

Email and text alerts when problems arise

Security in place at every level

Economical, subscription-based price model

Notes Widgets

Add notes right alongside your data in your views

Image Widgets

Add images of your equipment, serial numbers, and other important data in your views

Calculations

Add mathematical calculations, such as Delta T, to your sensor data

3D Overlays

See status overlaid on a drawing of your data center or a one-line diagram

User-made Views

Any user can create a view using intuitive drag-n-drop view widgets

User Permissions

Admin users manage fine-grained permissions for all their users

Maintenance Timers

Remind yourself via email or text when service is due

Wireless Sensors

Get basic temp, humidity, vibration, and more from our plug and play wireless sensors

Zendesk Integrated

Open tickets automatically in Zendesk
